DEMOGRAPHIC DATA FOR 139 IIASA
REGIONAL POPULATIONS:
A TECHNICAL APPENDIX

Andrei Rogers

April 1983
WP-83-48

Prepared as a technical appendix to
*Regional Population Projections for
IIASA Nations*, WP-83-41, International
Institute for Applied Systems Analysis,
Laxenburg, Austria.

Working Papers are interim reports on work of the
International Institute for Applied Systems Analysis
and have received only limited review. Views or
opinions expressed herein do not necessarily repre-
sent those of the Institute or of its National Member
Organizations.

INTERNATIONAL INSTITUTE FOR APPLIED SYSTEMS ANALYSIS
A-2361 Laxenburg, Austria

PREFACE

Interest in human settlement systems and policies has been a central part of urban-related work at IIASA since its inception. From 1975 through 1978 this interest was manifested in the work of the Migration and Settlement Task, which was formally concluded in November 1978. Since then, attention has turned to dissemination of the Task's results and to the conclusion of its comparative study, which is carrying out a comparative quantitative assessment of recent migration patterns and spatial population dynamics in all of IIASA's 17 NMO countries.

This paper is a technical appendix to the working paper *Regional Population Projections for IIASA Nations* and sets out demographic data for 139 regional populations in the 17 IIASA NMO countries.

Reports, summarizing previous work on migration and settlement at IIASA, are listed at the back of this paper. They should be consulted for further details regarding the data base that underlies this study.

Andrei Rogers
Chairman of the
former Human Settlements
and Services Area
